Supplementary Table 2. Cox proportional HR of mortality according to HGS trajectories of those with an above-average HGS at baseline

	Men		Women	
	HR (95% CI)	P-value	HR (95% CI)	P-value
Low HGS	2.94 (1.14–7.60)	0.03	3.80 (1.10–13.1)	0.03
Mid HGS	2.61 (1.04–6.57)	0.04	3.00 (0.92–9.85)	0.07
High HGS	1.00		1.00	

Analyzed by Cox proportional hazards regression models.
HR, hazard ratio; HGS, handgrip strength; CI, confidence interval.
