

Supplemental table 7. The outpatient clinic visit rate of females after attending the health screening program and diagnosed with diabetes mellitus, hypertension and dyslipidemia according to economic status

Variable	No.	Economic status					P-value*
		1 (Lowest)	2	3	4	5 (Highest)	
Diabetes mellitus							
Diagnosed	1,486	338 (3.82)	244 (3.25)	231 (3.18)	294 (3.24)	379 (2.57)	<0.001
Outpatient visit	642	133 (39.35)	105 (43.03)	97 (41.99)	124 (42.18)	183 (48.28)	<0.178
Hypertension							
Diagnosed	10,983	2,427 (27.41)	1,874 (24.92)	1,748 (24.04)	2,114 (23.29)	2,820 (19.11)	<0.001
Outpatient visit	4,212	900 (37.08)	736 (39.27)	662 (37.87)	799 (37.80)	1,115 (39.54)	<0.348
Dyslipidemia							
Diagnosed	6,398	1,203 (13.62)	974 (12.97)	1,033 (14.24)	1,269 (14.01)	1,919 (13.02)	<0.037
Outpatient visit	1,547	253 (21.03)	208 (21.36)	256 (24.78)	302 (23.80)	528 (27.51)	<0.001

Values are presented as number (%).

*By chi-square test for categorical variable.
